Environmental Product Declaration

In accordance with ISO 14025:2006 and EN 15804:2012+A2:2019/AC:2021 for:

NOVATOP OPEN

from

AGROP NOVA a.s.

NOVATOP MINING

Programme: The International EPD® System, www.environdec.com

Programme operator: EPD International AB

EPD registration number: S-P-11848

Publication date: 2023-12-14

Valid until: 2028-12-14

An EPD should provide current information and may be updated if conditions change. The stated validity is therefore subject to the continued registration and publication at www.environdec.com

Accountabilities for PCR, LCA and independent, third-party verification

Product Category Rules (PCR)

CEN standard EN 158041+A2 serves as the Core Product Category Rules (PCR)

Product Category Rules (PCR): PCR 2019:14 Construction products (EN 15804:A2) (1.3.1)

PCR review was conducted by: IVL Swedish Environmental Research Institute Secretariat of the International EPD® System

Life Cycle Assessment (LCA)

LCA accountability: Mgr. Barbora Vlasata, UCEEB CTU in Prague www.uceeb.cz

Third-party verification

Independent third-party verification of the declaration and data, according to ISO 14025:2006, via: EPD verification by accredited certification body

Third-party verification: TZÚS Praha, s.p. is an approved certification body accountable for the thirdparty verification

The certification body is accredited by: Czech Accreditation Institute

Procedure for follow-up of data during EPD validity involves third party verifier:

The EPD owner has the sole ownership, liability, and responsibility for the EPD.

EPDs within the same product category but registered in different EPD programmes, or not compliant with EN 15804, may not be comparable. For two EPDs to be comparable, they must be based on the same PCR (including the same version number) or be based on fully-aligned PCRs or versions of PCRs; cover products with identical functions, technical performances and use (e.g. identical declared/functional units); have equivalent system boundaries and descriptions of data; apply equivalent data quality requirements, methods of data collection, and allocation methods; apply identical cut-off rules and impact assessment methods (including the same version of characterisation factors); have equivalent content declarations; and be valid at the time of comparison. For further information about comparability, see EN 15804 and ISO 14025.

Company information

Owner of the EPD: Agrop Nova a.s.,

Contact: Jan Sušeň Sales manager

Jan.susen@agrop.cz www.agrop.cz

Description of the organisation:

AGROP NOVA a.s. was established in 2001. Today it is one of the largest and most modern producers of large multilayer boards in Europe. The company's core product range is NOVATOP SWP multilayer boards and NOVATOP SYSTEM - a comprehensive and in many ways unique building system based on cross-laminated timber (CLT).

Product-related or management system-related certifications:

ISO 9001:2015

Name and location of production site(s):

Agrop Nova a.s., Lesnická 49, 798 03 Plumlov, the Czech Republic (headquarters and drying of wood) Agrop Nova a.s., Ptenský Dvorek 99, 798 43 Ptení, the Czech Republic (plant)

Product information

Product name and identification:

NOVATOP OPEN

Product description:

NOVATOP OPEN - The construction of the element consists of a load-bearing bottom multilayer plate (SWP), on which prisms (KVH, DUO, TRIO, BSH, I-beams) are glued in the basic axial distance of 625 mm, fulfilling the load-bearing function. Transverse stiffening ribs are inserted between the individual prisms, reinforcing around the perimeter and around the building openings. The dimensions and spacing of the prisms can be adjusted according to the project requirements. The connection of the boards and ribs is carried out by gluing and cold pressing. The cavities between the prisms can be fitted with thermal insulation. The element can be sealed with another sheet material - diffusion open (e.g. Fermacell, DHF, DFP, etc.).

UN CPC code:

314 Boards and panels

Geographical scope:

Europe, Global

For modules A1-A3, A4 and C1-C4+D a European and Global scale has been considered due to the availability of data for waste scenarios.

LCA information

Functional unit / declared unit:

1 m³ of solid wood panel – mass 490 kg

Time representativeness:

< 10 years for background data;

< 2 years for manufacturer's data

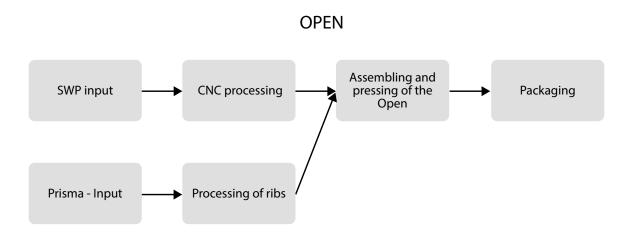

Database(s) and LCA software used:

Ecolnvent database v. 3.8; SimaPro 9.4.0.2 software

Description of system boundaries:

Cradle to gate with options, modules C1-C4, module D and with optional modules (A1-A3+C+D) and additional modules). The additional modules may be one or more selected from A4-A5 and/or B1-B7

System diagram

More information:

The electricity used in the production processes of module A3 is purchased from an electricity supplier and is supported by a Guarantee of Originit is electricity from renewable energy sources. The share of renewable energy sources was modelled based on the Czech Republic's energy mix current in the reference period. Its climate impact is $0,255 \text{ kg CO}_2$ eq./kWh (using the GWP-GHG indicator). More info about production see www.novatop-system.com

^{*} Disclaimer: The results of this environmental impact indicator shall be used with care as the uncertainties of these results are high or as there is limited experience with the indicator

¹ This indicator accounts for all greenhouse gases except biogenic carbon dioxide uptake and emissions and biogenic carbon stored in the product. As such, the indicator is identical to GWP-total except that the CF for biogenic CO₂ is set to zero.
